New TSS slipper clutch for Ducati 696/796

Code: 20003 / 20003C (with clutch springs)

Application: Ducati Hypermotard 796, Ducati Monster 796, Ducati Monster 696

In spite of Ducati declares slipping action on OEM clutch for this model, the real effect is pretty poor. From this reason TSS brings to market really well working clutch for this „small“ Ducatis.

The clutch is designed for OEM clutch plates working together with four pcs. of 1098 springs. As usually Ergal 7075 CNC machined clutch with hard anodized surface and steel springs posts , simply adjustable engine backtorque with higher preloaded spring retainers in kit. Increasing riding comfort, speed and safety during sport ride.
